

A message from our CEO

Dear Patient and Partner,

I am pleased to announce that we have just launched a new and breakthrough Brand Protection Program in Asia-Pacific,

This program aims to ensure patient safety and offer peace of mind by allowing patients to quickly and reliably verify the authenticity of the Sofwave™ device and treatment.

Counterfeit products are a growing concern across various industries, including aesthetics. These counterfeit products are not built to our specifications and have not been tested against the same safety and clinical performance standards as our patented and certified devices. We strongly recognize the need for superior outcomes and enhanced patient safety measures. Thus, Sofwave Medical has developed a cutting-edge authentication system for its Sofwave™ devices. Our Brand Authentication Program ensures that patients can be confident in the legitimacy of their treatment and avoid potential risks or lack of results associated with counterfeit products.

We strongly believe that through this program, patients can effortlessly verify the authenticity of the Sofwave™ device, assuring them that they are receiving top-quality and trusted treatments.

The Brand Protection Program utilizes advanced, tamper-proof QR code technology to enable patients to verify their Sofwave™ treatment quickly and easily. By implementing a unique identification system, patients can scan a specially designed code and receive immediate confirmation of the authenticity of their treatment.

Sofwave™ remains committed to advancing the field of aesthetics while placing patient safety at the forefront. Introducing this Brand Protection Program reaffirms our dedication to ensuring the highest standards of quality and authenticity across our innovative patented products and treatments.

Please get in touch with us at APAC@sofwave.com for any questions.

Sincerely,
Louis Scafuri
